

Anti-Xenopus Type II Cytokeratins monoclonal antibody, clone 1h5 (CABT-BL3809)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Immunogen	insoluble residues of Xenopus A6 (kidney epithelial) cells
Isotype	IgG12a
Source/Host	Mouse
Species Reactivity	Xenopus
Clone	1h5
Conjugate	Unconjugated
Applications	WB, IHC
Preservative	None
Storage	Store it under sterile conditions at -20°C upon receiving. Recommend to pack the protein into smaller quantities for optimal storage.

BACKGROUND

Introduction Cytokeratins are proteins of keratin-containing intermediate filaments found in the intracytoplasmic cytoskeleton of epithelial tissue. Cytokeratin represents an excellent marker for the discrimination of specific subtypes of adenocarcinoma. Keratin, type I cytoskeletal 19 also known as cytokekeratin-19 (CK-19) or keratin-19 (K19) is a protein that in humans is encoded by the KRT19 gene. Keratin 19 is a type I keratin.

GENE INFORMATION

Entrez Gene ID	397878
Protein Refseq	NP_001095227
UniProt ID	P16878
