

Anti-FBXL17 (aa 1-156) polyclonal antibody (CABT-BL4651)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

| | |
|---------------------------|---|
| Product Overview | Rabbit Polyclonal antibody to Human FBXL17. |
| Immunogen | Recombinant fragment, corresponding to a region within amino acids 1-156 of Human FBXL17, isoform 2 (AAI26145). |
| Isotype | IgG |
| Source/Host | Rabbit |
| Species Reactivity | Human |
| Purification | Immunogen affinity purified |
| Conjugate | Unconjugated |
| Applications | WB, IHC-P |
| Format | Liquid |
| Size | 100 µl |
| Buffer | pH: 7.0, 1.21% Tris, 20% Glycerol, 0.75% Glycine |
| Preservative | None |
| Storage | Shipped at 4°C. Upon delivery aliquot and store at -20°C or -80°C. Avoid repeated freeze/thaw cycles. |

BACKGROUND

| | |
|---------------------|---|
| Introduction | Members of the F-box protein family, such as FBXL17, are characterized by an approximately 40-amino acid F-box motif. SCF complexes, formed by SKP1 (MIM 601434), cullin (see CUL1; MIM 603134), and F-box proteins, act as protein-ubiquitin ligases. F-box proteins interact with SKP1 through the F box, and they interact with ubiquitination targets through other protein interaction domains (Jin et al., 2004 [PubMed 15520277]).[supplied by OMIM, Mar 2008] |
