

Mouse Anti-Dinitolmide monoclonal antibody, clone DNT (CABT-L4240)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	ELISA IC 50 (PPB): 100
Immunogen	Dinitolmide-KLH
Isotype	IgG
Source/Host	Mouse
Species Reactivity	N/A
Clone	DNT
Purification	Protein A purified
Conjugate	Unconjugated
Applications	ELISA, LFIA
Format	Liquid
Concentration	Lot specific
Size	1 mg
Buffer	PBS
Preservative	None
Storage	Short Term: 2-8°C. Long Term: -20°C. Avoid repeated freezing and thawing.
Ship	Wet ice
Warnings	For research use only.

BACKGROUND

Introduction Dinitolmide (or zoalene) is a fodder additive for poultry, used to prevent coccidiosis infections. It is sold under trade names such as Coccidine A, Coccidot, and Zoamix. Dinitolmide is usually added to feed in doses of 125 ppm (preventive) or 250 ppm (curative). It is a broad-spectrum

anticoccidial drug, preventing seven main strains of Eimeria coccidium. It leaves no residues in tissues. It can be also used to prevent coccidiosis of domestic rabbits.

Keywords Dinitolmide;zoalene;

GENE INFORMATION

Official Symbol Dinitolmide
