

Dinitolmide [OVA] (DAG5622)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description Dinitolmide (or zoalene) is a fodder additive for poultry, used to prevent coccidiosis infections. It is usually sold under trade names such as Coccidine A, Coccidot, and Zoamix. As a broad-spectrum anticoccidial drug, it can prevent seven main strains of Eimeria coccidium and coccidiosis of domestic rabbits while leaves no residues in tissues.

Nature	Synthetic
Expression System	N/A
Species	N/A
Conjugate	OVA
Applications	The antigen can be used in ELISA assay.
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements.
Size	1 mg
Buffer	0.01M pH7.4 PBS
Storage	Shipped at 4°C. Upon delivery aliquot and store at -20°C. Avoid freeze / thaw cycles.
