

Rat myoglobin reference serum (DAGA-697)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description Myoglobin (symbol Mb or MB) is an iron- and oxygen-binding protein found in the muscle tissue of vertebrates in general and in almost all mammals. It is related to hemoglobin, which is the iron- and oxygen-binding protein in blood, specifically in the red blood cells. In humans, myoglobin is only found in the bloodstream after muscle injury. It is an abnormal finding, and can be diagnostically relevant when found in blood.

Specificity	Rat
Nature	Native
Expression System	Rat
Conjugate	Unconjugated
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Size	1ml
Preservative	0.1% sodium azide
Storage	Frozen -20°C

BACKGROUND

Keywords Rat;Myoglobin;Serum
