

Rat NGAL reference serum (DAGA-698)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description Lipocalin-2 (LCN2), also known as oncogene 24p3 or neutrophil gelatinase-associated lipocalin (NGAL), is a protein that in humans is encoded by the LCN2 gene. NGAL is involved in innate immunity by sequestering iron that in turn limits bacterial growth. It is expressed in neutrophils and in low levels in the kidney, prostate, and epithelia of the respiratory and alimentary tracts. NGAL is used as a biomarker of kidney injury.

Specificity	Rat
Nature	Native
Expression System	Rat
Conjugate	Unconjugated
Format	Liquid
Concentration	Batch dependent - please inquire should you have specific requirements
Size	1ml
Preservative	0.1% sodium azide
Storage	Frozen -20°C

BACKGROUND

Keywords Rat;NGAL;Serum
