

Magic™ Anti-V. cholerae Toxin B Monoclonal antibody, Clone C2367N (DCAB-TJ084)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Specificity	Specific for the B subunit of cholera toxin and reacts with the intact toxin.
Target	V. cholerae Toxin B
Immunogen	Purified Cholera toxin B subunit.
Isotype	IgG1
Source/Host	Mouse
Species Reactivity	V. cholerae
Clone	C2367N
Purification	> 90% pure. Protein A Chromatography
Conjugate	Unconjugated
Applications	Suitable for use in ELISA. Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded. Recommended antibody pair fo Suggested pair for testing (Capture - Detection): DCAB-TJ085 - DCAB-TJ084
Procedure	Matched Antibody Pairs
Format	Purified, Liquid
Concentration	1.7 mg/mL (OD280 nm, E0.1% = 1.3)
Size	100 µg
Buffer	0.01 M PBS, pH 7.2
Preservative	0.1% Sodium Azide
Storage	Short term store at 2-8°C. Long term, aliquot and store at -20°C. Avoid multiple freeze/thaw cycles.
Warnings	Centrifuge before opening to ensure complete recovery of vial contents. This product contains sodium azide, which has been classified as Xn (Harmful) in European Directive 67/548/EEC in

the concentration range of 0.1-1.0%. When disposing of this reagent through lead or copper plumbing, flush with copious volumes of water to prevent azide build-up in drains.

BACKGROUND

Introduction

Cholera toxin (also known as cholera toxin and sometimes abbreviated to CTX, Ctx, or CT) is a protein complex secreted by the bacterium *Vibrio cholerae*. CTX is responsible for the massive, watery diarrhea characteristic of cholera infection.
