

Anti-ARL2BP monoclonal antibody (DCABH-10606)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Antigen Description ADP-ribosylation factor (ARF)-like proteins (ARLs) comprise a functionally distinct group of the ARF family of RAS-related GTPases. The protein encoded by this gene binds to ARL2.GTP with high affinity but does not interact with ARL2.GDP, activated ARF, or RHO proteins. The lack of detectable membrane association of this protein or ARL2 upon activation of ARL2 is suggestive of actions distinct from those of the ARFs. This protein is considered to be the first ARL2-specific effector identified, due to its interaction with ARL2.GTP but lack of ARL2 GTPase-activating protein activity.

Immunogen	A synthetic peptide of human ARL2BP is used for rabbit immunization.
Isotype	IgG
Source/Host	Rabbit
Species Reactivity	Human
Purification	Protein A
Conjugate	Unconjugated
Applications	Western Blot (Transfected lysate); ELISA
Size	1 ea
Buffer	In 1x PBS, pH 7.4
Preservative	None
Storage	Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

GENE INFORMATION

Gene Name	ARL2BP ADP-ribosylation factor-like 2 binding protein [Homo sapiens]
Official Symbol	ARL2BP
Synonyms	ARL2BP; ADP-ribosylation factor-like 2 binding protein; ADP-ribosylation factor-like protein 2-binding protein; BART; BART1; binder of Arl2; binder of Arl Two; binder of ARF2 protein 1; ARF-like 2-binding protein; Arf-like 2 binding protein BART1;

Entrez Gene ID	23568
Protein Refseq	NP_036238
UniProt ID	A0A024R6U9
Chromosome Location	16q13
Function	protein binding; small GTPase regulator activity; transcription coactivator activity;
