

Anti-14-3-3 monoclonal antibody, clone 4G8 (DCABH-3890)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview	Mouse monoclonal to 14-3-3
Antigen Description	Adapter protein implicated in the regulation of a large spectrum of both general and specialized signaling pathways. Binds to a large number of partners, usually by recognition of a phosphoserine or phosphothreonine motif. Binding generally results in the modulation of the activity of the binding partner. Negative regulator of osteogenesis. Blocks the nuclear translocation of the phosphorylated form (by AKT1) of SRPK2 and antagonizes its stimulatory effect on cyclin D1 expression resulting in blockage of neuronal apoptosis elicited by SRPK2.
Immunogen	Recombinant full length protein (Human 14-3-3 gamma).
Isotype	IgG1
Source/Host	Mouse
Species Reactivity	Human
