

# In Vivo Antibacterial Model

Creative Diagnostics is a full-service contract research organization specializing in microbiology and preclinical infectious disease research. Creative Diagnostics can customize animal models of human diseases. We believe that providing clients with the best animal model solutions is the most effective way to promote key research from creativity to reality. We guarantee that the animal models required for research are strictly regulated to ensure responsible, ethical, and humane treatment.

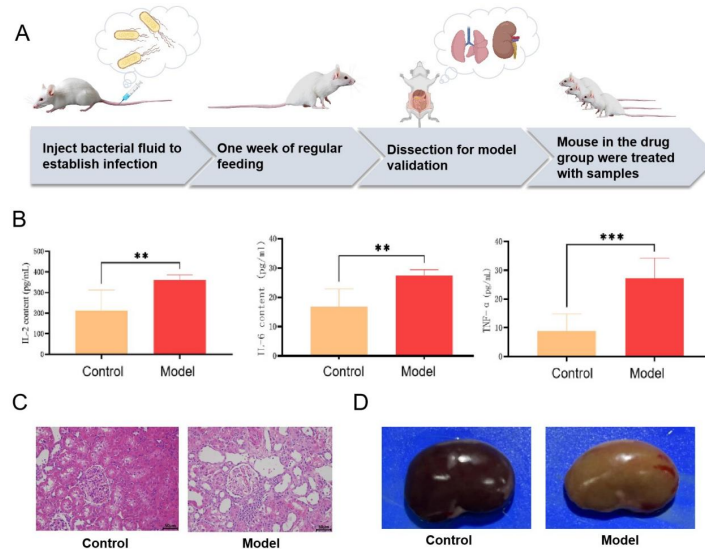

Figure 1. Establishment and validation of a mouse bacterial infection model. A. Flowchart for establishment of mouse bacterial infection model. B. Serum ELISA test. C. HE staining of visceral tissues. D. Gross observation of visceral tissues.

## Our Advantages

- Full range of species
- High efficiency and quality of infection model services
- Competitive price for infection model services
- 24/7 online service
- Timely result feedback
